CIVIL INFRASTRUCTURE / DISTRIBUTION SYSTEMS

Trenchless technologies and fusible piping systems are becoming mainstream in the civil infrastructure space as our suppliers increase their capability to produce large bore HDPE pipe, fittings and the tooling required to install them.

Asmuss provides a comprehensive range of Electrofusion, Butt/Spigot fittings and accessories up to 1,000mm in diameter, covering all SDR ratings, for both gas and water/ sewer reticulation. We offer backing rings for flanged connections and a range of mechanical and double seal ductile iron fittings. Ductile Iron valves are also available.

We support PFS/Plasson and Ritmo machines and tools both for purchase and for hire. We can provide packages and advice on welders to best meet customer's needs. Butt Welding machine purchases will include set up and operation training for customers. We have an inhouse hire fleet of electrofusion machines and tooling.

Our Technical Department has fully trained and manufacturer certified technicians who can perform calibration, maintenance and repairs and general trouble shooting for machinery and tooling. This team can also carry out weld inspections and undertake any field failure reports which will be supported by the Plasson/Simona/PFS technical engineers. We have access to a fully accredited IANZ testing laboratory.

Factory made fabricated fittings and custom joining services are also available in house. Our sister company has capability that extends from 90-1200mm diameter fittings including but not limited to slim flanges, bends, tees, reducers and long and short spigots.

Asmuss supports the Bob Le Hunt Certification courses for Butt and Electrofusion welding (refer www.pewelding.co.nz) and along with Plasson NZ we belong to the PIPA NZ Polyethylene Pipelines Industry Group.

BUILDING SERVICES / MECHANICAL SYSTEMS

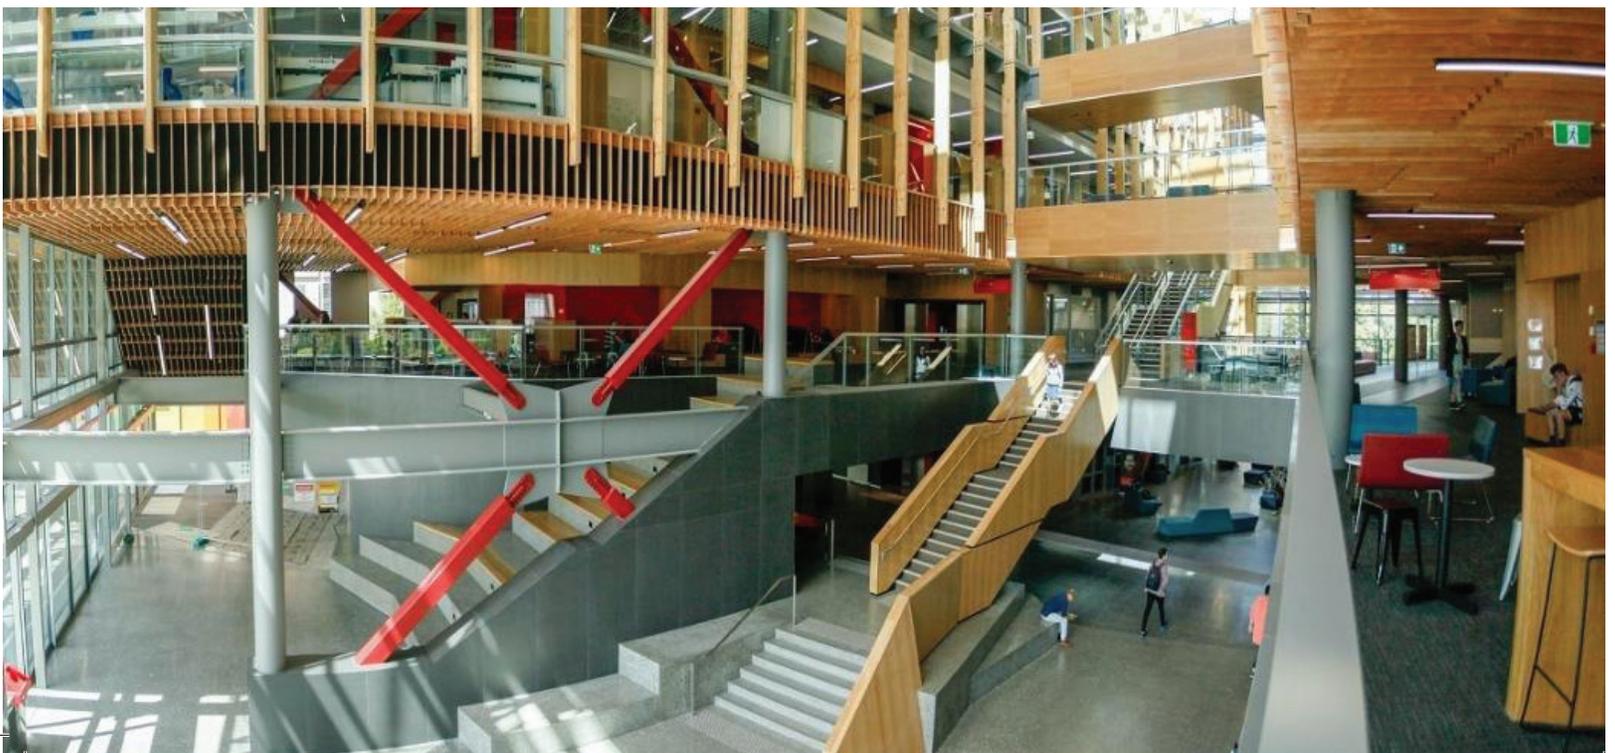

Designers are pushing the boundaries with modern multifunctional buildings with striking aesthetics which challenge traditional hydraulic methods for downpipes and stacked drainage systems serving a multitude of uses. Internal cavities for services are squeezed as developers demand more available space.

Siphonic roof drain systems and Sovent stacks allow more freedom and flexibility for hydraulic and mechanical designers to meet the needs of developers. Sound attenuated drainage and greasy waste also need consideration when designing multifunctional buildings.

The new Geberit Mapress 316 SS Crimped Piping System is now available, which is ideal for mechanical, compressed air & plumbing applications. Through the Asmuss Group we can offer both plastic and metal piping solutions for the fire protection, chilled water, compressed air and HVAC applications. We are happy to assist with any enquires you may have.

High purity water systems are required for numerous applications in Health and Science facilities. These can range from boiler feeds, analyser equipment through to laboratories and the preparation of reagents. Each application has its own set of requirements involving the chemistry of the water and the microbiological conditions that need to be upheld. Our Vulcathene PP chemical waste systems are used in manufacturing, laboratories and laundries.

Asmuss has a long history supplying the New Zealand marine industry with a range of systems that have major international maritime approvals. We offer solutions for the distribution of potable water, black & grey water lines and HVAC.

INDUSTRIAL / PROCESS PIPING APPLICATIONS

Chemical handling for industry is an area of specialisation for Asmuss. The correct material selection and installation are critical for a successful system, as is having a full range of pipes, fittings, valving and instrumentation available.

The selection of plastic (corrosion resistant) piping for cold applications is limited by the failure mode of many materials at low temperatures. We can offer a solvent welded or fusion welded alternative depending on your needs. Typical uses are cooling lines to manufacturing equipment or Brine / Glycol lines in food production.

Water treatment is an important function for many areas of activity in New Zealand. Potable water, and treatment for municipal swimming pools are vital in the civil environment, and industrial processes require De-ionised, De-mineralised or filtered water for many applications. Clean feed water is required for Brine solutions, scrubbers, chemical production, or power generation to name a few.

Water purity is critical in applications such as medical dialysis, medicine production, semi conductor production and laboratory water. We can provide systems that provide Type II or even Type I Ultra-pure water by using Infra-red or Bead and Crevice free welding.

ABS

Section 1

ABS (Acrylonitrile Butadiene Styrene) is a robust material suitable for a range of applications.

Asmuss offers the Durapipe Imperial sized product range, and the GF Metric system.

A full range of ABS valves are available in the valve price lists.

ABS Imperial

ABS Metric

Imperial ABS Thermoplastic Pipework Systems

ABS (Acrylonitrile Butadiene Styrene) pipework has been formulated to optimise performance in respect of tensile strength and ductility. The benefits of ABS piping systems, can make it the first choice for some demanding fluid handling applications.

Benefits

Impact Strength: Maintains excellent impact resistance down to -40°C.

Tough: Ductile material with excellent resistance against fatigue, notching effects and crack growth.

Abrasion Resistance: Excellent wear properties for a wide range of slurries

Light Weight: Approximately 1/6th the weight of the equivalent steel pipes allowing for a quick and simple installation.

Environmental Advantage: ABS is Lead and Chlorine Free and is easily recycled.

Exceptionally Smooth Bore: Low friction allows high flow velocities and inhibits the formation of scale.

Weather Resistance: Does not corrode in weather and is resistant to sunlight so does not always require painting or wrapping.

Applications

Mechanical Services: Condenser Lines, Chilled Water Lines, Cooling Tower Pipework, Potable Water, Sewer Vent and Waste, Swimming Pools, Water Features.

Mining and Mineral Processing: Slurry Lines, Borefields, Electrolyte, Process Water, Chemical Handling.

Water and Wastewater Infrastructure: Water and Wastewater Treatment, Process Lines, Grit lines, Aeration Tanks, Borefields and Irrigation Schemes, Trunk Mains, Treated Effluent Re-Use, Potable Water Distribution, Rising Mains, Sewerage Treatment

Industrial and Power Generation: Process Water, Cooling Water, Demineralised Water, Ash Slurry Disposal.

Infrastructure: Potable Water Distribution, Property Services, Buried Fire mains, Rising Mains.

Please refer to technical notes for insulation materials, the use of thread seal compounds and other installation requirements.

The ABS Pipe System

Asmuss offers ABS pipe in 6, 9, 12 and 15 bar pressure rating, although offerings are limited in some sizes. Fittings are designed to be used with all classes and pressures of pipe and are joined using a solvent cement technique. Threaded, flanged and shouldered end connections are also available when joining to different pipe materials, pumps or valves.

For installation or technical queries on ABS please contact our sales team on (09) 477 2320

+GF+ ABS Metric Piping System

Acrylonitrile butadiene styrene [ABS] is a homogeneous material with high impact strength and ductility, good chemical resistance, good resistance to environmental stress cracking and excellent resistance to crack propagation. Other advantages are its suitability for use at low temperatures [-40°C], it is easily recyclable and is non-toxic, and can be regarded as biologically inert.

Advantages

- Economical material costs
- Quick and easy to joint requiring practically no investment and minimal training
- Smooth inner bore reduces pressure losses to a minimum and can reduce the size of piping required in comparison with other less efficient systems [e.g., metal generally]
- Its light weight reduces transport costs and enables quick, easy handling on site
- A low thermal conductivity, approx. 2000 times lower than copper, optimizes your piping system reducing to a minimum energy loss and reducing or often eliminating the need for insulation
- No corrosion
- Reduced maintenance costs

Standards & Approvals

George Fischer metric fittings in ABS are generally in accordance with DIN 8063 and the pipe with DIN 16890/16891. George Fischer ABS has a whole range of marine approvals from all the major classification societies, namely Germanischer Lloyd, Lloyds Register, Det Norske Veritas, American Bureau of Shipping, Bureau Veritas, Rina etc.

Temperature and Pressure

The permissible working temperature range for an ABS pipe system is from -40°C to +60°C.

The pressure ratings for ABS pipe, fittings and valves are as follows:

Metric

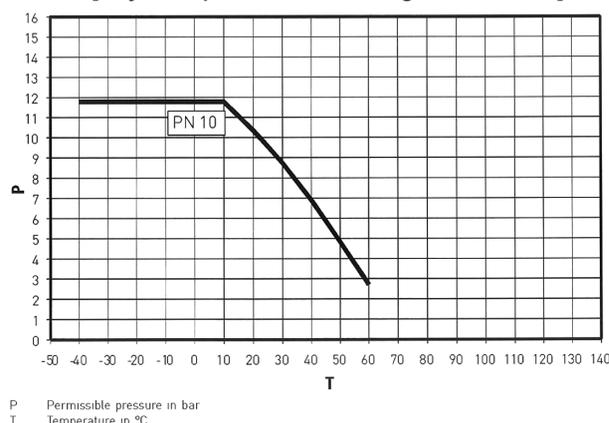

Pipe	10 bar	[PN 10 or 145 lbf/in ²]
Fittings 16-225 mm	10 bar	[PN 10 or 145 lbf/in ²]
Valves	10 bar	[PN 10 or 145 lbf/in ²]

Pressure ratings for thermoplastic pipework are always quoted at 20°C. It can be used at higher temperatures, but it is a fundamental principle in thermoplastic pipework that if the temperature is increased then the pressure rating must be reduced. Reduction factors can apply when using media other than water. Please consult our technical advisory service.

The table to the left shows, for an ABS pipe system, the maximum permissible pressures at various temperatures up to the maximum of 60°C. The table is based on an ambient temperature of 20°C with water as the medium. A design factor of 2.0 is incorporated into all calculations with a life span of 25 years.

According to the 10° line in the hydrostatic strength curve for ABS a permissible pressure of 12 bar in the temperature range of -40° to +10°C for the PN 10 system can be applied.

For metric pipes and fittings
[25 years operation with a design factor = 2.01]

+GF+ Schedule 80 PVC Hi-Strength Industrial Piping System

Asmuss Group's PVC Schedule 80 Piping system is truly an industrial product. Often referred to as 'Hi Strength' PVC, its industrial grade wall thickness and excellent chemical resistance, make it ideally suited for industrial process applications where system integrity is vital. Schedule 80 is a complete system with valving and instrumentation component available.

Chemical Resistance

PVC Schedule 80 offers excellent resistance to most acids and alkalis. For specific recommendations please contact Asmuss Group on (09) 477 2320. For central foaming systems please refer to the our technical paper listed below.

Solvent Cement Jointing

The Installation of PVC Schedule 80 pipework should only be undertaken by suitably qualified and experienced persons. Please contact Asmuss Group for appropriate training.

Asmuss Group recommend the use of IPS-724 solvent cement when jointing PVC Schedule 80. This has been specifically developed for use with PVC Schedule 80 in chemical applications.

Standards

PVC Schedule 80 was initially developed for the American market and as such is made to the relevant ASTM Standards. Flanges are drilled to the ANSI 150 pattern and threaded fittings are NPT. Please note that this is different to the Table D/E flanges and BSP threads common to New Zealand. A limited range of threaded BSP fittings are included in the range to assist transitions in New Zealand. These fittings are not of Schedule 80, but are of industrial grade PVC.

+GF+ Schedule 80 CPVC Hi-Temp Industrial Piping System

Asmuss Group's CPVC 'Hi-Temp' Schedule 80 piping system is a truly industrial product with special application in process pipework where high integrity and excellent chemical resistance are required.

Chemical Resistance

CPVC (Chlorinated Polyvinyl Chloride) is particularly useful for handling corrosive fluids at temperatures up to 99°C. In chemical resistance, it is comparable to PVC. It weighs about one-sixth as much as stainless steel, will not sustain combustion (self-extinguishing) and has low thermal conductivity. Suggested uses include process piping for hot corrosive liquids, hot and cold water lines, and similar applications above the temperature range of PVC. CPVC pipe may be joined by solvent welding, threading or flanging.

Solvent Cement Jointing

The installation of CPVC Schedule 80 pipework should only be undertaken by suitably qualified and experienced persons. Please contact Asmuss Group for appropriate training.

Asmuss Group recommend the use of IPS-724 solvent cement when jointing CPVC Schedule 80. This has been specifically developed for use with CPVC Schedule 80 in chemical applications.

Standards

CPVC Schedule 80 was initially developed for the American market and as such is made to the relevant ASTM Standards. Flanges are drilled to the ANSI 150 pattern and threaded fittings are NPT. Please note that this is different to the Table D/E flanges and BSP threads common to New Zealand.

+GF+ Clear PVC Pipe For Metric & Imperial Systems

PVC / CPVC

Clear PVC piping is a valuable addition to our PVC piping systems. We have both metric and imperial dimensions available to match either the +GF+ Metric PVC or the Schedule 80 PVC systems respectively.

We also have a range of clear fittings and valving available, as well as the clear cement & primer required for joining the piping systems.

Please contact Asmuss Group for information on our other piping and valving systems.

Imperial Clear PVC

Ideal for site glasses within Schedule 40/80 Hi-Strength systems, or other imperial pipework.

Refer to Schedule 80 price list for dimensionally compatible fittings.

Please contact us for chemical compatibility.

	CODE:	Size (NB)	Wall Thickness	Price

+GF+ Metric Clear PVC-u

This European range can be used as a visual inspection point for our secondary containment system as well as for standard site glasses.

This pipework has a nominal pressure rating of PN16 to 63mm and PN10 for larger sizes.

Refer to PVC-u Industrial PROFIT price list for dimensionally compatible fittings.

PVC-U Industrial +GF+ Metric Piping Systems Incl the PRO-FIT family

The +GF+ Metric PVC-U system is designed for industrial applications and is commonly used to convey chemicals, aggressive media and water. This European product range is produced from high quality raw materials specifically for demanding applications and for compatibility with the +GF+ range of industrial valving.

Applications:

- Water treatment
- Thermal baths and swimming pools
- Surfactant based central foaming systems
- Waste water treatment
- Sewage treatment plants
- Cooling water
- Drinking water treatment
- Food and beverage industries

Chemical Resistance

PVC-U has excellent chemical resistance against aqueous saline solutions, acids, alkalines, fuels and oils. Please contact Assmuss for full details of chemical resistance.

PRO-FIT SYSTEM

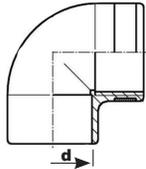

The PRO-FIT system offers installation advantages in both time and space savings. Six innovative spigot-socket fitting shapes provide the following benefits:

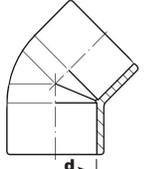

- Integrated cementing length and insertion depth marking makes handling faster, safer and easier.
- Direct jointing of fitting to fitting without extra pipe sections means less joints, quicker installations and space savings of up to 20%
- Dry assembly gives the ability to set up the installation before final cementing is carried out.
- 45° angles marked on both end face and socket and spigot branches means easy alignment and accurate angles.

uPVC Pressure Piping System

PVC / CPVC

uPVC Pressure pipe is manufactured to AS/NZS 1477 "PVC pipes and fittings for pressure applications". uPVC Pressure pipe is compatible with the AsmuSS Group range of uPVC Pressure pipe fittings. Pipe is available with either a solvent cement socket (SOE) or a rubber ring joint socket (RRJ) on one end.

IPS WELD-ON Solvent Cements & Compounds

PVC / CPVC

IPS WELD-ON is the industry leader, offering the most complete line of solvent cements commercially available. Each WELD-ON formulation has been developed for a specific application.

Asmuss Group recommend the use of the Weld-On range of cements with the following piping systems:

- PVC Schedule 40 & 80 Piping Systems
- CPVC Schedule 80 Piping Systems
- PVC AS/NZS Pressure and Non-Pressure Piping Systems

Please contact Asmuss Group for assistance in selecting the correct solvent cement and primer for your application.

Related Documents:

- PS Machines and Tooling Catalogue
- The Science of Solvent Cement.

Asmuss Group offer **Weld ON IPS Solvent Cement Training Courses.**

We recommend all installers using IPS Solvent Cement have training before use.

PRIMERS

	CODE:	SIZE	PRICE (ea)
IPS P-68 Clear Primer 	IPSP-68/125	118ml	8.06
	IPSP-68/250	237ml	10.93
	IPSP-68/500	473ml	19.10
	IPSP-68/1LT	946ml	30.55
	IPSP-68/1GAL	3.785L	91.66

Clear, fast acting primer for both PVC and CPVC in all sizes.

	CODE:	SIZE	PRICE (ea)
IPS P-70 Purple Primer 	IPSP-70/250	237ml	25.78
	IPSP-70/500	473ml	37.55
	IPSP-70/1LT	946ml	57.56
	IPSP-70/1GAL	3.785L	147.09

Purple, very fast acting and aggressive primer for both PVC and CPVC in all sizes. P-70 primer is strongly recommended when installing CPVC and PVC piping systems for chemical applications

	CODE:	SIZE	PRICE (ea)
IPS P-75 Wet & Dry Primer 	IPSP-75/500	473ml	26.00

*This primer is to be used with IPS 725 cement only

711 PVC CEMENT*

	CODE:	SIZE	PRICE (ea)
IPS 711 PVC Heavy Bodied Solvent Cement 	IPS711/250	237ml	15.97
	IPS711/500	473ml	31.35
	IPS711/1LT	946ml	56.18
	IPS711/1GAL	3.785L	161.84

Grey, heavy bodied, medium setting, PVC cement for all types of PVC (SCH80, Metric, ASNZS) pipe in larger diameters through to 315mm.

724 CPVC/PVC CEMENT - INDUSTRIAL*

	CODE:	SIZE	PRICE (ea)
IPS 724 PVC & CPVC Heavy Bodied Solvent Cement 	IPS724O/500	473ml	40.85
	IPS724O/1LT	946ml	68.43

Orange, heavy bodied, medium setting, PVC and CPVC cement for chemical applications in sizes through to 300mm.

724 Grey Cement has been phased out and has been replaced with 724 Orange.

719 PVC CEMENT*

	CODE:	SIZE	PRICE (ea)
IPS 719 PVC Extra Heavy Bodied Solvent Cement 	IPS719/1LT	946ml	56.18
	IPS719/1GAL	3.785L	161.84

Grey, extra heavy bodied, slow setting, grey PVC cement suitable for AS/NZS PVC pipe up to 710mm.

*Cement has gap filling properties and is suitable for a parallel fit.

PRICES INDICATED DO NOT INCLUDE GST

IPS WELD-ON

Solvent Cements & Compounds

700 PVC CEMENT

	CODE:	SIZE	PRICE (ea)
IPS 700 PVC Regular Bodied Solvent Cement	IPS700/125	118ml	7.96
	IPS700/250	237ml	11.35
	IPS700/500	473ml	18.78
	IPS700/1LT	946ml	29.60
	IPS700/1GAL	3.785L	95.64

Clear, regular bodied, fast setting, PVC cement for AS/NZS PVC pipe of all classes and pressures through to 100mm.
*Not suitable for SCH80 Pipe

705 PVC CEMENT

	CODE:	SIZE	PRICE (ea)
IPS 705 PVC Medium Bodied Solvent Cement	IPS705/125	118ml	8.96
	IPS705/250	237ml	13.20

PVC / CPVC

PP / PVDF / PFA

Section 3

Asmuss supports a range of Industrial piping solutions that possess excellent mechanical, physical and temperature tolerant characteristics with a broad range of chemical resistance.

In addition, we have systems suitable for clean room and ultra pure water applications.

Valves are available for all these systems (refer section 4)

PP-H Piping System

PVDF Piping System

PFA Tube & Fittings

+GF+ PP-H Polypropylene Piping System

The +GF+ PP-H piping system is renowned for its excellent resistance to a wide range of chemicals, & its ability to withstand temperatures up to 95°C.

Manufactured from Polypropylene homopolymer PP-H 100 beta (β) - nucleated, the +GF+ PP-H system is designed specifically for industrial applications. It differs from other types of polypropylene in that it has a very fine structure and significantly higher impact strength. This high degree of crystallinity ensures excellent chemical resistance, which is further improved by the use of titanium dioxide pigment.

The +GF+ PP-H system, is joined using either socket fusion or infra-red (IR) welding for high purity applications. Fittings for both jointing methods are detailed within this price list.

PP / PVDF / PFA

+GF+ PVDF Polyvinylidene fluoride Piping System

The +GF+ PVDF piping system is renowned for its outstanding mechanical, physical and chemical characteristics and its ability to withstand a very wide temperature range from -20°C to 140°C.

Polyvinylidene fluoride belongs to the class of fluorine polymers, that include polytetrafluor ethylene (PTFE). PTFE is characterized by extreme temperature resistance and the best chemical resistance of all plastics. Unfortunately it is not workable on a thermoplastic basis, which provides limited use as a piping system. In comparison PVDF combines the advantage of good workability in thermoplastic piping systems, while retaining the various advantages of PTFE. The Fluorine content of PVDF is 59%

This high end piping system is ideally suited for the delivery of pharmaceutical grade purified water (PW) and DI water, using hot water, steam chemical or ozone sanitisation. Due to its excellent chemical resistance it is widely used in chemical distribution systems.

PFA Tube & Fittings

PFA Tube & Fittings

This industrial grade flexible tubing system is manufactured PFA. Although similar to PTFE, PFA is mechanically superior, has 1/10th the creep characteristics, and is transparent. The most common usage for this material is chemical dosing, where transportation of highly corrosive chemicals are used.

PFA fittings are specifically designed, tested and characterized to work together with industrial grade PFA tube. Fittings are connected to the tube by first heating the end of the tube with a hot air gun and expanding or flaring the end of the tube using a flaring mandrel. This flared end is then inserted into the fitting body before tightening the nut.

Assembly Instructions

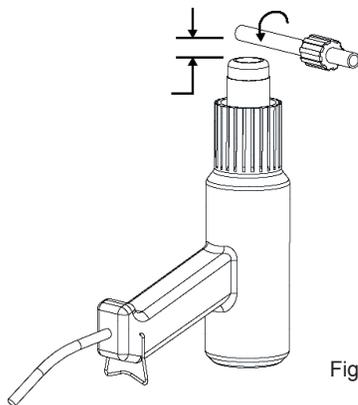

Figure 1

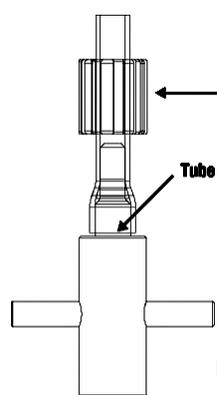

Figure 2

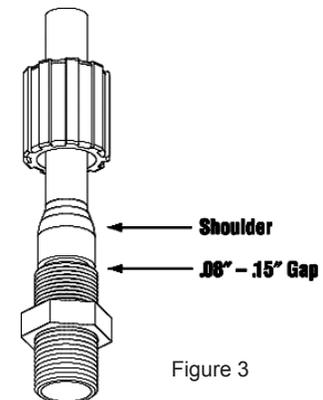

Figure 3

Heat Flaring Instructions

The flaring process provides a permanent expansion (flare) of the tubing end, allowing insertion of the fitting body. Proper tube flaring and fitting assembly results in a very secure tubing connection.

1. Set the hot air gun on "High". Hold the PFA tubing end flush with the heater edge and 1/2" to 3/4" above the heater (see Figure 1) and slowly rotate the tubing 360° for 25 seconds, or until a fine, clear line appears around the tubing.

Note: It is very important to fully rotate the tubing over the heat source so all surface areas receive an equal amount of heat. Uniform heating

is essential to making a good flare.

2. Remove the PFA tubing from the heat source. Immediately push the flaring mandrel (see Figure 2) into the tubing until the end of the tubing reaches the tube stop.
3. Firmly hold the tubing onto the mandrel for 20 seconds
4. Let the flared tubing continue to cool on the mandrel for 2 minutes for 3/8" tubing or 3 minutes for 1/2" and 3/4" tubing.
5. The flaring process is now complete and the mandrel may be removed from the tube.
6. Push the flared tubing end onto the fitting body until the end of the fitting body contacts the flare shoulder of the tube (see Figure 3). The maximum gap between the tube end and end of threads should be .08"-.15".
7. Tighten the nut onto the fitting body until handtight.

FIP Double Union PVC Ball Valves

The FIP VE ball valves are ideally suited to conveying water & harmless fluids. The valves are full bore, with double unions and a safe block design offering fully adjustable removable seats. Ball seats are made from PE-PTFE technopolymer with EPDM O-rings. Valves are available with a PVC body, imperial socket and BSP threaded ends.

FIP PVC Butterfly Valves

The FIP FE Wafer Butterfly Valve is an effective solution for the isolation of larger pipe systems with a size range from DN 40 up to DN200 mm. Valves are supplied with EPDM seals and stainless steel shafts as standard. Gear boxes and actuators can be added and are available on request.

The FK lugged version can be used as an end of line valve by fixing the bolts directly to the valve body.

Philmac Valves

Philmac valves are manufactured from glass reinforced polypropylene (GRP). Their simple rugged construction makes them ideally suited for use above or below ground in irrigation and water distribution lines. Philmac Ball Valves are M&I Marine approved.

+GF+ Coloro Ball Valves

The "Coloro" PVC Ball valves from +GF+ are an economical valve, ideal for many commercial applications, including spa pools and swimming pools, where a high degree of chemical resistance is not necessary. With all PVC construction, and high quality seats made from PE/PTFE, their superior quality and design compared with other one piece valves provides a high level of safety. The two piece body is permanently fused around an integral ball and stem, providing a non-adjustable valve that will provide a long maintenance and service free life.

NOTE: This is a Run-Out range. A New valve range will replace these soon.

+GF+ Manual Valves For Chemical Process Applications

Asmuss Group offers the broadest range of high quality thermoplastic valves available from stock in New Zealand. These valves are ideally suited for chemical handling and other corrosive or severe industrial applications.

As the design and use of plastic valves differs considerably from that of metal valves, Asmuss Group can provide specialist technical assistance, site visits or demonstrations to help select the valve best suited to particular applications.

Most of the valves shown on this list can be considered to be available from stock, or with very short delivery times. Many other types, sizes or material options are also available on special order. Full technical literature on our complete valve range is available upon request. We welcome your specific enquiries.

+GF+ 546 Double Union Ball Valves

The +GF+ 546 is a full bore plastic ball valve designed with the most demanding applications in mind. The unique modularity of the valve allows customisation to exactly suit a customer's requirements. A wide variety of construction materials are available.

Measurement & Control

All +GF+ Valves are of a modular construction. If the valve combination you require is not on our price list please contact us as we are likely to be able to build a valve to meet your requirements.

Asmuss Group stock a comprehensive range of spare parts and accessories. Please contact us for more information.

PRICES INDICATED DO NOT INCLUDE GST

+GF+ Manual Valves

For Chemical Process Applications

+GF+ Control Ball Valves - Check Valves

The +GF+546 Ball Valve when fitted with a control ball allows fine control and throttling of flows in sizes up to 50. The ball is specially designed to give a linear correlation between the angle of the handle and flow rate.

	CODE:	Size (NB) mm	Price
546 Linear Control Valve Ball Only	161491032	15	253.26
	161491034	25	253.26
	161491037	50	308.20
			
To be used with 546 Ball Valve			

The +GF+323 Metering Valve is for fine throttling in low flow applications. Indicator permits pre-determined flow rates to be duplicated.

	CODE:	Size (NB) mm	Price
523 Metering Valve PVC-U, EPDM Seals	VGf523/010	10	212.36
	VGf523/015	15	212.36
			

+GF+ 561 Ball Check Valves

The new streamlined check cone and the refined geometry provide for a significantly improved flow compared to valves with a check ball, without compromising functionality or leak-tightness.

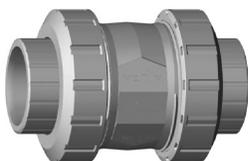

The self-closing mechanism operates autonomously, without any other energy source with a minimal line pressure.

The wide range of connecting options means easy integration of the valves in all piping systems.

+GF+ 562 Spring Check Valves

Any installation position is possible thanks to the spring.

The 562 check valve is equipped with a spring mechanism and closes tightly even without a water column. Thanks to this new design feature, the valve can be built in either vertically or horizontally.

A full range of material and seal options available.

Springs available in Stainless Steel, Nimonic 90 & Nimonic 90 Halar Coated.

For Chemical Process Applications

+GF+ 543 3 - Way Ball Valves

The new +GF+ 543 Ball Valve (replacing the 343 model) provides quality, flexibility and reliability in both horizontal and vertical versions. The horizontal version come with an L or T port and is available in PVC-U, PVC-C, ABS, PP-h and PVDF. The vertical version is available in PVC-U and ABS with a metric solvent cement spigot as the third outlet. Diverter balls are also an additional option.

All +GF+ Valves are of a modular construction. If the valve combination you require is not on our price list please contact us as we are likely to be able to build a valve to meet your requirements.

Asmu Group stock a comprehensive range of spare parts and accessories. Please contact us for more information.

+GF+ Manual Valves

For Chemical Process Applications

+GF+ 582 PRESSURE REDUCING VALVE

Pressure reducing valves, often referred to as pressure control valves, ensure that the pressure at the valve outlet remains constant. They are used wherever a higher system pressure needs to be reduced to a pre-defined value. Depending on the application, fluctuating pressures are evened out or devices branching out from the main pipeline are protected against excessive pressure.

Note: All valves listed are WITHOUT Manometer

+GF+ 586 PRESSURE RETAINING VALVE

Pressure retaining valves, also known as overflow valves, ensure that the pressure at the valve inlet remains constant. They are used whenever the system pressure needs to be constant or a defined counterpressure needs to be generated against feed pumps. They balance out pressure pulsation and reduce pressure peaks.

Note: All valves listed are WITHOUT Manometer

+GF+ Manual Valves

For Chemical Process Applications

+GF+ 567 Industrial Standard Butterfly Valve

The model 567 Butterfly Valve is uniquely designed with a unique double eccentric disc. This reduces the frictional behaviour reducing seal wear and provides improved protection against pressure surges. Operating torque is reduced by up to 50% increasing service life. The standard lever operated valve has 6 ratchet teeth to engage in the index plate ensuring safe and secure lever positioning. The index plate is set to 5 degree increments and is and optional fine adjustment can be fitted. Optimal limit switches can be fitted inside the shaft housing.

Gearbox operated models are also available in PVC-U

+GF+ Manual Valves

For Chemical Process Applications

The new generation +GF+ Diaphragm Valves have been created with three key elements in mind: safety, simplicity and efficiency. Now with one single central housing nut, plug and play features and improved liner flow properties the new generation valve series is an excellent choice for chemical process, water treatment and microelectronics applications.

These modular valves will be available in a range of materials and be configured with double union, spigot and flanged connections.

Measurement & Control

+GF+ 514 Valves can be configured in other materials. Please contact Asmuss Group for pricing information and availability.

The +GF+ 515 Spigot End and 517 Flanged range will be introduced later in the year. Please refer to our 315 and 317 series price list.

+GF+ 317 Diaphragm Valves

The +GF+ 317 model has flanged end connections and is available in sizes up to 150 with ANSI-150 or ISO/DIN drilling configurations. Sizes 65-100mm have fixed flanges. If you need other combinations other than those listed in our price-list please contact us.

Flanged ends for 15-50mm Diaphragm Valves can be achieved by using the 315 model Diaphragm Valve and appropriate flanges (refer to our Piping Systems range).

+GF+ Electrically Actuated Valves For Chemical Process Application

Assmuss builds in-house actuation assemblies and can customise to meet your exacting needs, including a wide range of additional accessories.

For ease of pricing and ordering we have created a basic actuator assembly kit featuring the appropriate actuator and the adaptor parts to assemble and test a complete actuated valve.

ALL you have to do is select the assembly and add the valve from our manual price list to get your pricing and for ordering purposes. If you require additional functionality, please contact our office.

ELECTRIC ACTUATION

The +GF+ Electric Actuators type EA15, EA25, EA45, EA120 and EA250 are not only well equipped, they are also characterized by very high peak torques from 25 Nm to 250 Nm making them able to automate a wide range of valves. The electric actuators serve to operate valves with a rotating angle of 90° to 180°. The actuators can be installed on any common valves with inter-faces according to ISO 5211.

Accessories are available to operate valves in continuous operation.

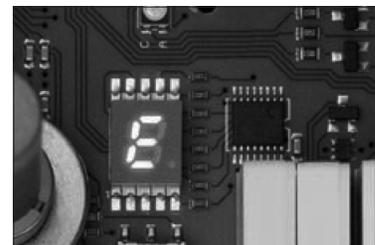

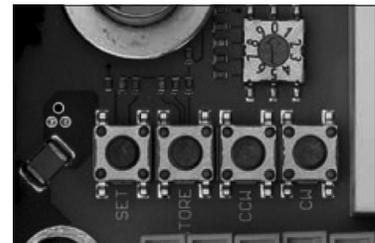

Features:

- LED Feedback - Reading of the actuator position as well under difficult light conditions
- Integrated feedback
- Electric position feedback for position Open/Close/Middle
- Integrated heater with dial for temperature
- 7-Segment error display
- Position sensor with easy re-adjustment teach-buttons to manually reset open and closed position
- Profibus DP-V0 compatible
- Simple selection and assembly of accessory parts

Measurement & Control

+GF+ PNEUMATICALLY ACTUATED 3 WAY- BALL VALVES

The 285-288 model incorporates the +GF+ 543 3-Way Ball Valve and a compact pneumatic actuator available in either L or T-Port configuration. The L-Port configuration normally requires a 2 position 90 degree actuator whilst the T-Port valve may require a 3 position Electric Actuator. Available Fail Safe Close, Fail Safe Open or Double Acting. A visual position indicator shows valve position. Please contact us for the valve material and the actuator configuration you require.

The 543 Ball Valves are available in PVC, CPVC, ABS, PP & PVDF. Refer to the 543+GF+ Brochure for more configuration details.

SWITCH KITS

The above prices are for standard actuated valves without switch kits.

Variable Area Flow Meters

For simple and accurate measurement of fluids and gases

Pressure range

Nominal pressure 10 bar at 20 °C

Materials

Tube:	Polyamid, Polysulphone, PVDF and PVC-U transparent
Float:	PVDF, PTFE
End stops:	PVDF
Screw connection:	PVC-U (PP, PVDF, ABS)
O-ring:	EPDM (FPM)
Guiding rod:	Peek

Calibrated scales

The standard version comes with a printed on double scale: a percentage scale and a scale giving flow rate (H2O l/h).

The special scales come as a sticker and need to be fitted to a blank taper tube. The scales are adhesive bonded to the tube and are printed with a special hard wearing paint.

Standard scale:

l/h

Special scales:m³/h, GPM**Scales for other liquids:**

HCl 30-33%, NaOH 30%, Na-OH 50% and air

+GF+ Signet Flow Measurement & Instrumentation

George Fischer Signet delivers sophisticated, advanced flow and analytical technology, which offer accuracy, dependability, ease of use, and minimal maintenance. Every sensor, transmitter, controller and monitor manufactured meets the highest of standards. Engineered for performance, Signet products are ideally suited for Chemical Process, Food and Beverage, Life Sciences, Shipbuilding, Semiconductor, Water and Waste Water Treatment, including the Pool Industry, and Agriculture.

This pricelist is designed to be read in conjunction with the +GF+ Signet Catalogue, available on request, or the website, www.gfsignet.com. For details on the +GF+ Signet range of Analytical Instrumentation, please refer to the separate price list.

2551 INSERTION MAGMETER

Signet Insertion Magmeters feature no moving parts to wear or foul and high accuracy sensing without the excessive costs associated with full bore magnetic flow units. The units accurately measure flow in fluids containing a high content of particles, solids and fibres, making them an excellent choice for applications with dirty fluids. A minimum conductivity of 20µS is required.

Magmeters have three signal output options: frequency, digital, or 4-20mA, for long distance signal transmission application requirements. Basic diagnostic capabilities allow the user to optimize the meter for each application. The 4 to 20mA output is factory spanned and can be modified in the field using the PC compatible accessory set-up tool, model 3-0250.

Suits flow velocities 0.05 to 10 m/s, and pipe sizes up to DN300

Code	Price
Blind Meter, Frequency Output	
SG3-2551-P0-11	\$2,353.79
SG3-2551-P1-11	\$2,467.63

SG3-2551-P2-42	\$4,500.02

Measurement & Control

2552 INSERTION MAGMETER

Ideal for dirty and high solid content liquids, and hot tap installations. 316 Stainless Steel Body, suits flow velocities 0.05 to 10m/s, and pipe sizes up to DN2500. The 3-2552-3 meter has an insertion depth of 419mm, and so is suitable for accurate flow measurement in extremely large pipe diameters, and/or heavy wall pipes such as PE, even in hot-tap applications.

2552-1 and -2 meters mount using an 1-1/4in thread, 2552-3 uses an 1-1/2in thread. Sensors are available either with a fixed 7.6m cable, rated NEMA 4 (IP65), or with a watertight connector and separate cable, giving a NEMA 6X rating (IP68). This configuration is suited to a maximum of 3m submersion depth for no more than 10 days continuous submersion.

Fixed Cable Sensor, IP65

Code	Price
Frequency or Digital (S3L Output)	
SG3-2552-22-A-11	\$6,027.27

Flow Measurement & Instrumentation

FLOW SENSORS

Paddlewheel sensors offer traditional, dependable, and accurate flow measurement. They can be used in conjunction with separately mounted digital displays, or as blind sensors.

515 ROTOR-X PADDLEWHEEL

Suit flow velocities of 0.3 to 6m/s. They have a sinusoidal output capable of driving a self powered flowmeter, such as the 3-5090.

Standard Sensor
(with red cap)

Integral Sensor

Code	Price
Standard Sensor	
SGP51530-P0	\$658.37
SGP51530-P1	\$856.26
SGP51530-P2	\$927.30
Integral Mount Sensor	
SG3-8510-P0	\$526.16
SG3-8510-P1	\$568.26

Compatible with: 5090, 9900 Transmitter

2536 ROTOR-X PADDLEWHEEL

Low flow model, with process ready open-collector output, and good noise immunity. Suit flow velocities 0.1 to 6m/s, accepts a 3-24V power supply.

Standard Sensor
(with blue cap)

Integral Sensor

Code	Price
Standard Sensor	
SG3-2536-P0	\$955.67
SG3-2536-P1	\$1,010.10
SG3-2536-P2	\$1,060.65
Integral Mount Sensor	
SG3-8512-P0	\$583.59
SG3-8512-P1	\$624.98

Compatible with 9900 Transmitter

525 METALEX FLOW SENSOR

Suitable for extreme pressures and temperatures, for flow velocities 0.5 to 6m/s. Requires socketweld or weldon installation fittings sold separately.

Compatible with 9900 Transmitter

Code	Price
SGP525-1	\$1,361.51
SGP525-2	\$1,361.51

2537 BLIND PADDLEWHEEL FLOW SENSOR

The 2537 blind Paddlewheel flow sensor combines a traditional paddlewheel flow sensor with a blind output option. It is a standalone unit, with no external display. Measures flow velocities down to 0.1 m/s, Outputs can be connected directly to Chart Recorders, PLC's, or pump VSD's by using either the pulse divider with configurable range and width, or the programmable 4-20mA Output.

The 2537 can also be used as a flow switch, with programmable low and high set points, and adjustable hysteresis.

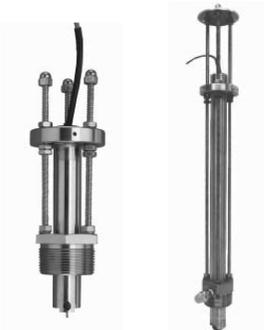

Stand-alone unit

Code	Price
Pulse Divider & Flow Switch Output	
SG3-2537-2C-P0	\$1,367.76
SG3-2537-2C-P1	\$1,431.68
4-20mA Output	
SG3-2537-6C-P0	\$1,500.52
SG3-2537-6C-P1	\$1,563.42

2540 STAINLESS STEEL FLOW SENSOR

Strength and corrosion resistance of 316 Stainless Steel, and the convenience of an insertion sensor design. Suitable for flow velocities 0.1 to 6m/s.

2540-2 is suitable for pipes up to DN600. The 2540-4 suits up to DN900, and includes a bleed valve for hot tap installations. Both models mount using a 1-1/2in Thread.

Standard Sensor

Hot-Tap Sensor

Code	Price
SG3-2540-2	\$1,901.54
SG3-2540-4	\$ P.O.A

Compatible with 9900 Transmitter

+GF+ Signet Flow Measurement & Instrumentation

9900 FLOW TRANSMITTER

"At a glance visibility" due to extra large characters and a digital bar graph from an auto-sensing backlit LCD display. Single sensor input compatible with signals from all GF Signet Flow, pH/ORP, Conductivity, Salinity, Pressure or Temperature sensors as well as any non-GF Signet sensors that outputs a 4-20mA signal (requires GF Signet 8058 signal convertor).

One permanent and one resettable totaliser, LED relay or warning indicators. Analogue (4 – 20MA) and open collector with user selectable pulse units output.

Relay module and batch controller modules are optional extras and can be retrofitted (Panel version only).

Panel or field mount versions available. Requires 12 to 32VDC power supply.

SG3-9900-1
(Field Mount) \$1,262.24

SG3-9900-1P
(Panel Mount) \$1,262.24

SG3-9900-1BC
(Panel Mount) \$2,905.47

Measurement & Control

MOUNTING KIT

Universal mount kit to mount field transmitter on to a wall or other flat surface
SG3 - 8050 \$131.10

Integral mount kit to mount field transmitter on to the top of an integral sensor
SG3 - 8051 \$121.91

OPTIONAL EXTRAS

SG3-9900.393
(Relay Module) \$248.90

SG3-9900.397
(Batch Module) \$1,643.22

5090 SENSOR POWERED FLOW MONITOR

Ideal for stand-alone applications as no power source required. Combine with the 515 Rotor-X paddlewheel flow sensor for an economic flow monitoring solution.

Analogue display with front panel calibration options.

SG3-5090 \$762.54

8900 MULTI-PARAMETER INSTRUMENT

This instrument is built to order from user specified modules. With up to 6 inputs that can include flow, pH/ORP, conductivity, pressure, temperature and/or turbidity and up to 4 outputs,(analogue and relays). AC and DC power options are available.

Advanced relay logic allows up to 3 measurement sources to trigger relay.

Derived measurements include: difference, sum, ratio, percent recovery, percent rejection, percent passage and BTU (or Kw)

Price varies depending on configuration; please enquire.

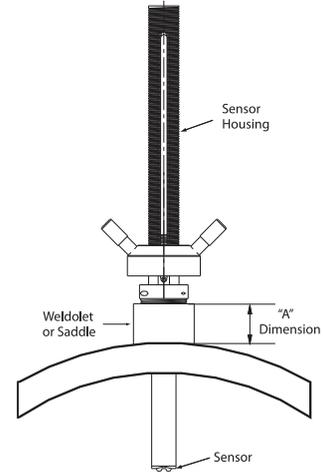

INSTALLATION FITTINGS

All the previously mentioned Flow Sensors measure flow velocity at a set point, and from this calculate the total flow rate through the pipe system. For accurate and repeatable measurements fully developed turbulent flow is required. For full details and installation requirements refer to GF Signet Literature.

For optimum accuracy Signet recommend that the pin on a paddlewheel flow sensor, or the tip of an Insertion Magmeter, is positioned at a point 10% of the Pipe ID from the inside of the pipe wall.

Installation fittings broadly fit into 2 categories, depending on the flow sensor to be used.

FITTINGS FOR 2540 AND 2552 METAL FLOW METERS

The 1-1/4in or 1-1/2in mounting thread allows the use of a conventional branch saddle, or Weld-o-let.

Sensors can easily be fitted to PE pipes (as shown here) using Electrofusion Saddles and threaded adaptors.

Hot-tap installations can also be easily incorporated.

FITTINGS FOR 515, 2536, 2537, PADDLEWHEELS, AND 2551 INSERTION MAGMETERS

For smaller diameter Schedule 80 PVC pipelines Signet offer off the shelf installation fittings which meet this requirement. For other materials, configurations, and pipe diameters a variety of installation options are available.

Flow meters are available with differing insertion depths to suit the pipe diameter:

Size Code	Insertion Depth	Nominal Pipe Size
PO	51mm	up to DN100
P1	84mm	DN100 to DN200
P2	160mm	DN250 and above

For plastic, and other pipes with thicker walls, it is sometimes necessary to use a longer sensor.

SCHEDULE 80 PVC TEES

Suit Schedule 80 PVC Pipework. 80 and 100mm sizes compatible with NZS PVC Pipe

Size	Code	Price
15mm	SGPV8T005F	\$241.72
25mm	SGPV8T010F	\$241.72
32mm	SGPV8T012F	\$271.79
40mm	SGPV8T015F	\$285.14
50mm	SGPV8T020	\$513.19

PVC CLAMP-ON SADDLES

Suit Schedule 80 PVC Pipework. 80 and 100mm sizes compatible with NZS PVC Pipe

Size	Code	Price
80mm	SGPV8S030	\$559.48
100mm	SGPV8S040	\$686.03
150mm	SGPV8S060	\$805.27

PP ADAPTOR INSERTS

For larger pipe diameters it is necessary to use either a conventional saddle, or weld-o-let, in conjunction with a threaded adaptor. For plastic pipes the Alprene saddles from AsmuSS Group are ideal. Some machining may be required.

	Code	Price
Suit P0 Length Sensor, and 32mm Female BSP Saddle	SGI515P0/032	\$135.59
Suit P1 Length Sensor, and 50mm Female BSP Saddle	SGI515P1/050	\$199.17
Suit P2 Length Sensor, and 50mm Female BSP Saddle	SGI515P2/050	\$244.66

Note: Prices are for inserts only. Saddles are sold separately.

+GF+ Signet Analytical Measurement & Instrumentation

George Fischer Signet delivers sophisticated, advanced flow and analytical technology, which offer accuracy, dependability, ease of use, and minimal maintenance. Every sensor, transmitter, controller and monitor manufactured meets the highest of standards. Engineered for performance, Signet products are ideally suited for Chemical Process, Food and Beverage, Life Sciences, Shipbuilding, Semiconductor, Water and Waste Water Treatment, including the Pool Industry, and Agriculture.

This pricelist is designed to be read in conjunction with the +GF+ Signet Catalogue, available on request, or the website, www.gfsignet.com. For details on the +GF+ Signet range of Flow Instrumentation, please refer to the separate price list.

ANALYTICAL - pH / ORP

The Signet 2724-2726 pH and ORP electrodes feature a patented reference electrode design and use the unique foul-proof patented DryLoc® connector, with gold plated contacts. The robust Ryton® threaded sensor body and choice of flat pH, bulb pH, or flat ORP sensing elements provides broad range of chemical compatibility for a wide variety of applications.

The Signet 2764-2767 Differential pH & ORP electrodes are built to handle even the most extreme and harshest of chemical applications. The pH and reference electrodes are measured against a ground electrode, insuring a steady and stable signal. To ensure a long service life, the reference cell features a refillable electrolyte chamber and a replaceable equitransferant salt bridge, both easily serviced in the field.

(The 2714 Twist-Loc series of electrodes and associated preamplifiers has been discontinued, and replaced with the below)

2724-2726 pH AND ORP ELECTRODES

Mount using Signet Install Tee or 3/4" thread

	Code	Price
For Use with 2750 Sensor Electronics and 9900 Transmitter		
Flat pH	SG3-2724-00	\$627.66
Bulb pH	SG3-2726-00	\$535.52
Bulb pH, HF	SG3-2726-HF-00	\$763.86
Bulb pH, Low Cond.	SG3-2726-LC-00	\$627.66

For Use with 2760 Preamplifier and 8750 Transmitter		
Flat pH	SG3-2724-10	\$627.66
Bulb pH	SG3-2726-10	\$535.52
Bulb pH, HF	SG3-2726-HF-10	\$763.86
Bulb pH, Low Cond.	SG3-2726-LC-10	\$627.66

For Use with either 2750 or 2760		
Flat, ORP	SG3-2725-60	\$671.73

2764-2767 DIFFERENTIAL pH AND ORP ELECTRODES

Mount using Signet Install Tee or 1" NPT thread

	Code	Price
For Use with 2750 Sensor Electronics and 9900 Transmitter		
Flat pH	SG3-2764-2	\$1,228.28
Bulb pH	SG3-2766-2	\$1,158.91

For Use with 2760 Preamplifier and 8750 Transmitter		
Flat pH	SG3-2764-1	\$1,228.28
Bulb pH	SG3-2766-1	\$1,158.91

For Use with either 2750 or 2760		
Flat, ORP	SG3-2765-1	\$1,228.28

Other Differential Electrodes are available for use with the Signet Multiparameter unit, and also as 3000 units for connection to other brands of instruments.

PRICES INDICATED DO NOT INCLUDE GST

ANALYTICAL - pH / ORP CONT...

Signet pH and ORP electrodes can be used with a sensor electronics unit as a stand alone "blind" instrument with 4-20mA output, or combine with the +GF+ Signet 9900 Transmitter for local display and various output and control functions.

2750 SENSOR ELECTRONICS FOR DIRECT 4-20MA OUTPUT

Produces a direct 4-20mA output for use when a blind meter is required. The EasyCal feature recognises common pH and ORP buffer values.

	Code	Price
Inline Sensor, Yellow Body		
Electrics Only for use with 9900	SG3-2750-1	\$909.62
Electronics with EasyCal for stand alone "blind"	SG3-2750-2	\$1,004.63
Submersible Sensor, NPT		
Electronics Only for use with 9900	SG3-2750-3	\$815.33

2760 PREAMPLIFIER AND CONNECTOR FOR CONNECTION TO OTHER INSTRUMENTS

Use a 2760 Pre-amplifier for connection to Signet 8750. Use a Connector for use with other manufacturer's units.

	Code	Price
Inline Mounting		
Pre-amplifier	SG3-2760-11	POA
Connector	SG3-2760-31	POA
Submersible Sensor, NPT		
Pre-amplifier, 4.6m cable	SG3-2760-1	POA
Connector, 4.6m cable	SG3-2760-3	POA

9900 FLOW TRANSMITTER

"At a glance visibility" due to extra large characters and a digital bar graph from an auto-sensing backlit LCD display. Single sensor input compatible with signals from all GF Signet Flow, pH/ORP, Conductivity, Salinity, Pressure or Temperature sensors as well as any non-GF Signet sensors that outputs a 4-20mA signal (requires GF Signet 8058 signal converter). One permanent and one resettable totaliser, LED relay or warning indicators.

Analogue (4 – 20MA) and open collector with user selectable pulse units output.

Relay module is an optional extra and can be retrofitted (Panel version only). Panel or field mount versions available. Requires 12 to 32VDC power supply.

	Code	Price
Field Mount	SG3-9900-1	\$1,262.24
Panel Mount	SG3-9900-1P	\$1,262.24

Optional Extras:

Relay Module	SG3-9900.393	\$248.90
Conductivity Module	SG3-9900.394	\$465.18

8050 Universal Mount Kit

Universal Mount Kit is used to mount a field mount transmitter onto a pipe, wall, or other flat surface.

	Code	Price
	SG3-8050	\$131.10

pH / ORP CALIBRATION AND MAINTENANCE SOLUTIONS

Buffer Solutions

The mV output from the pH electrode is created by the interaction between the electrode and the fluid. The electrode contains a gel that depletes over time, so the instrument must be readjusted periodically to maintain system accuracy.

The Signet pH buffers are ideal for routine calibration requirements.

For ease of transportation, pH buffer kits are available in powder form. 1 kit provides enough to make 50mls of 4,7, and 10pH buffer solution.

Code	Price
SG3-0700.390	\$23.53

Replacements for Differential Electrodes

Signet Differential pH and ORP electrodes can be used in more aggressive applications, and can be maintained to improve their service life before replacement becomes necessary.

If readings become inaccurate by more than 50mV it is recommended to replace the electrolyte solution.

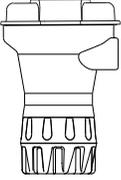

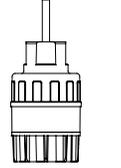

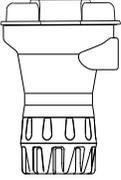

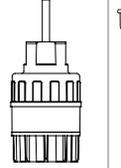

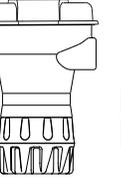

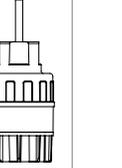

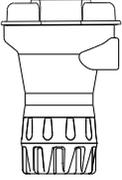

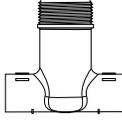

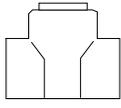

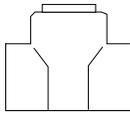

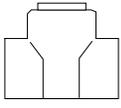

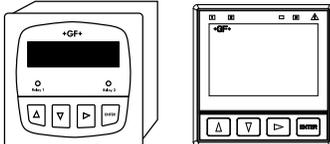

If readings start to slowly drift, or respond slowly, then the salt bridge should be replaced.

	Code	Price
Replacement Salt Bridge	3864-0001	POA
Replacement Electrolyte Solution, 500mls	3864-0002	POA

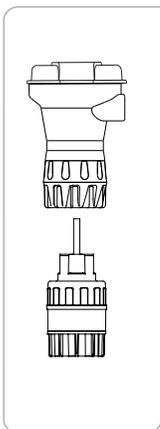

+GF+ Signet Analytical Measurement & Instrumentation

2750 Product Selection Guide

1. Choose the Electrode	2724-2726 Can use Any 3-272x series Electrode 		2764-2767 Differential 3-2764-1 3-2764-2 3-2766-1 3-2766-2 		2774-2777 ORP electrodes must have 10K ID resistor use: 3-2775, 3-2777 pH Electrodes can be either the 1K or 3K use: 3-2774, 3-2774-1, 3-2776, 3-2776-1 		2756 and 2757 Wet-Tap Can use any Wet-Tap 275x series electrode 								
	2. Determine the mounting style:														
	In-line And -In-line fitting Or Submersible	 2750-1 or -2		 2750-3 or -4		 2750-1 or -2		 2750-3 or -4		 2750-1 or -2		 2750-3 or -4		 2750-1 or -2	
	 Signet fitting		 3/4" reducing tee		 1" threaded tee		 3/4" reducing tee		 3719 Wet-Tap Assembly (Submersible not applicable with Wet-Tap assembly)						
2750-3 or -4 and cable conduit (customer supplied) connected to 3/4" sensor electronics 															
3. Junction Boxes								3-8050-1: Use when extending the submersible cable over long distance. 3-8050-2: Use with the submersible 2750-3 or -4 and the in-line 2750-1 for best calibration results with the EasyCal function when using the blind 4 to 20 mA output. 							
4. Choose the output instrument								Digital (S ³ L) Or 4 to 20 mA							
 8900 or 9900 Instruments				OR				 PLCs or Chart Recorders							

Ordering Information

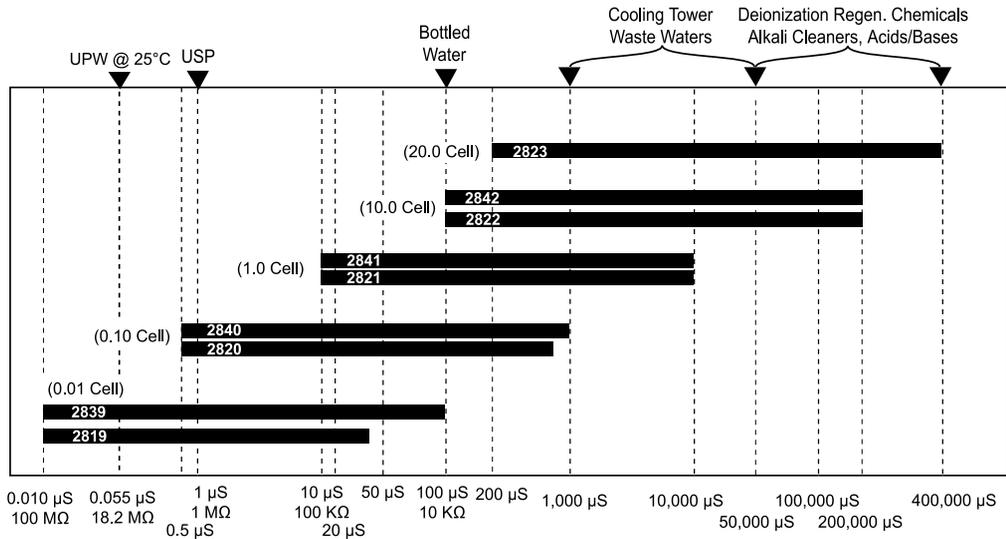

Mfr. Part No.	Code	Description
In-line Sensor Electronics (Yellow body)		
3-2750-1	159 000 744	Recommended for 8900 or 9900 instruments
3-2750-2	159 000 745	with EasyCal, recommended for 4 to 20 mA use
Submersible Sensor Electronics (Grey body)		
3-2750-3	159 000 746	with 4.6 m (15 ft) cable and 3/4 in. NPT threads - when 4 to 20 mA is required use the 3-8050-2 junction box with EasyCal
3-2750-4	159 000 842	Submersible Sensor electronics with 4.6 m (15 ft) cable and ISO 7/1R 3/4 threads - when 4 to 20 mA is required use the 3-8050-2 junction box with EasyCal

Sensor Electronics with preamplified signal and Digital (S³L) output (for use with the Multi-Parameter Instruments) or 4 to 20 mA output - power supplied to unit dictates output type.

CONDUCTIVITY

Signet Conductivity/Resistivity Sensors are designed to provide versatile installation and accurate sensing across a very broad dynamic range. Coupled with Signet-patented measuring circuitry a three decade range with $\pm 2\%$ of reading accuracy is achieved.

2819-2823 CONDUCTIVITY ELECTRODES

2819-2823 Electrodes are available with 3/4in NPT process connections as standard. 1-1/2in or 2in tri-clamp options are available.

Cell Size	Code	Price
0.01cm cell	SG3-2819-1	\$759.22
0.1cm cell	SG3-2820-1	\$723.17
1cm cell	SG3-2821-1	\$723.17
10cm cell	SG3-2822-1	\$1,014.30
20cm cell	SG3-2823-1	\$1,521.05

2839-2842 CONDUCTIVITY ELECTRODES

2839-2842 Electrodes offer a compact solution, and are dual 3/4in threaded for ease of installation in submerged applications.

Cell Size	Code	Price
0.01cm cell	SG3-2839-1	\$651.06
0.1cm cell	SG3-2840-1	\$651.06
1cm cell	SG3-2841-1	\$651.06
10cm cell	SG3-2842-1	\$900.78

Any of the above electrodes can be used with one of the GF Signet Conductivity Instruments to give various configurations of digital and analogue display, and outputs. Alternatively the 2839-2842 range can be coupled with the 2850 Sensor Electronics to give an Integrally Mounted blind 4-20mA output.

2850 SENSOR ELECTRONICS

Direct 4-20mA Output, with EasyCal. Suitable for Integral Mounting with a 2839-2842 Electrode.

Mount Type	Code	Price
Integral / Standpipe Mount	SG3-2850-52	\$1,019.63
Universal Mount	SG3-2850-62	\$1,019.63

8860 TWO CHANNEL CONDUCTIVITY CONTROLLER

Dual Sensor Input, and 3 fully scaleable 4-20mA Outputs. Ideal for Water treatment applications, Display and /or control μS , mS , PPM, PPB, $\text{k}\Omega$, $\text{M}\Omega$. Calculated measurements include Difference, Ratio, or % Rejection.

Code	Price
SG3-8860	\$2,554.05
SG3-8860-AC	\$2,554.05

TEMPERATURE

2350 TEMPERATURE SENSOR

One Piece PVDF Body, Digital or 4-20mA Output

Code	Price
SG3-2350-1	\$661.62
SG3-2350-2	\$661.62
SG3-2350-3	\$865.48

Compatible with 9900, or Stand-alone

PRESSURE

2450 PRESSURE SENSOR

One Piece PVDF Body, Digital or 4-20mA Output, 0-10 psi, 0-50psi, or 0-250psi

Code	Price
SG3-2450-1L	\$772.77
SG3-2450-3U	\$1,074.96
SG3-2450-3H	\$1,074.96
SG3-2450-7H	\$1,259.12

Compatible with 9900, or Stand-alone

Mechanical

ALPRENE POLY16 BRANCHING SADDLES

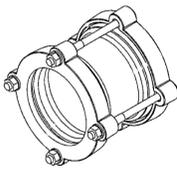

Alprene Poly16 branching saddles are designed for installation on all metric pipes. The strength of the joint lies in the specially developed profile gasket. It offers more safety in case of water hammer, oval or scratched pipes. The sturdy construction with reinforcing ribs has been designed for use under the harshest on-site conditions. The extra long, stainless steel reinforcement ring in the outlet branch prevents cracking, even with high torques. The working pressures for the branch saddles are 16 bar (at 20 °C water) for up to 160mm (o.d.) and 10 bar (at 20 °C water) from 180mm to 315mm (o.d.).

Dismantling Joints

Asmuss Dismantling Joints are a double flanged fitting that provides easy installation and disassembly of flanged fittings such as valves, meters and pumps in a pipe network. These fittings are suitable for water, waste water and gas reticulation as well as power generation and industrial cooling systems.

Mechanical Couplers, Gibaults, Tapping Bands, Expansion Joints & Riken Couplers

The Asmuss Group multi joint range of pipe couplings, offer a mechanical jointing method with end load restraint for all common pipe materials. The fittings are designed to accept a wide variation in pipe size allowing a single fitting to be used on any common pipe material in a given size.

PE, PVC, ABS, PP, AC, Cast Iron, Ductile Iron, Steel, Stainless, Copper...

Sizing & Pressure Ratings

Sizing

Asmuss Group multi joint fittings are wide range couplings and will fit any pipe material in a given pipe dimension.

Pressure Rating

Multi/Joint couplings come standard with restraint connections and a 16 bar pressure rating*
(300mm+ Only 10 bar).

With these couplings the fixers that provide the endload restraint can be removed to provide a non-restraint connection and an increased pressure rating of 25bar.

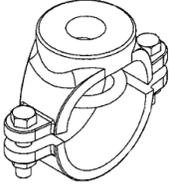

* Based on water at 20°C

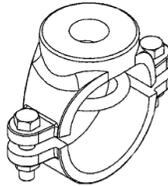

Size (mm)		Pressure Rating Bar

PE Fusion

Section 6

PE 100 (Polyethylene) is a material with wide ranging capabilities and temperature tolerance from -50°C to 60°C. It is used in a range of applications including compressed airlines, gas and water distribution, as well as industrial applications.

Joining is carried out by Electrofusion or Butt fusion to give a continuous system or by mechanical means where fusion is not possible.

For quality installations it is critical to have the right training, tooling and welding equipment. Asmuss can help in all these areas.

Servicing And Calibration

Asmuss has an in-house service department with trained and certified technicians, that provide servicing, calibration, trouble shooting and repairs for all the tools we support which include Ritmo, Plasson, Grossenbacher and Novapress.

Our service workshop has state-of-the-art manufacturers approved testing and calibration equipment and we hold a range of spare parts, so we can get your machines and tools back in the field as quickly as possible.

As authorised repair agents we extend our services to all repairs and maintenance even for items that have not been purchased through Asmuss.

Quality and Standards

Asmuss Group is a leading distributor of PE piping systems in New Zealand and carries a comprehensive range of fittings and equipment, backed by technical advice and service. The fittings listed comply with internationally accepted standards including AS/NZS Standard 4129:2000, Fittings for polyethylene (PE) pipes for pressure applications. Specifying authorities are advised to require compliance with product standards to ensure the integrity of permanent works.

Asmuss Group recommend that the installation of all polyethylene pipe fittings, only be undertaken by suitably qualified and experienced operators.

HDPE Long Spigot Fabricated Fittings Advantage 29 Series Mitred Bends

Assmuss Group have been supplying bespoke fabricated fittings for major projects for many years. As the size of pipe manufactured in New Zealand increases, so too has the demand for off the shelf large bore fittings. Our Plasson and Simona moulded HDPE spigot fittings range has increased to follow HDPE capability, and we can now offer standard pricing for large bore fabricated bends and tees on a made to order basis. Other fittings such as reducing tees and reducers are also available on a POA basis.

The fabricated fittings are made from PE100 pipe made in accordance with AS/NZS 4130 and the fabrication fittings follow POP006 PIPA guidelines.

ADVANTAGE 29 SERIES: FULL BORE, LONG SPIGOT, FABRICATED MITRED BENDS

Manufactured In Accordance With POP006, the 29 Series bends are manufactured to the exact dimensional requirements in terms of pressure rating and specific SDR. The mitre configurations are designed using POP006 PN=FB xPN Pipe. The mitre angles shall not be greater than 15 Degrees.

FURTHER OPTIONS AVAILABLE - PRICES AVAILABLE ON REQUEST:

- We are able to fabricate to all other dedicated PN ratings
- Fully moulded bends are available in some sizes
- 30 & 60 Degree options are available in all sizes
- Butt Welded options are available in all sizes and angles

HDPE Long Spigot Fabricated Fittings

Advantage 28 Series Mitred Bends

ADVANTAGE 28 SERIES - REDUCED BORE, LONG SPIGOT, FABRICATED MITRED BENDS

Manufactured In Accordance With POP006, the 28 Series bends made from pipe with an increased SDR dimension to achieve the desired PN rating. This option requires less mitres and can be used if a reduced bore is acceptable.

ADVANTAGE 28 SERIES - REDUCED BORE PN16 MITRE BENDS

PLASSON® PE100 Imperial Series 3 Electrofusion & Spigot Piping Systems

Quality and Standards

Plasson ElectroFusion fittings are manufactured using PE 4710 black compounded resins listed in the PPI TR-4 and conform to international standards for potable water including NSF 61. The fittings are designed, tested and quality controlled in accordance with Plasson's internal standards. These standards are based on ASTM D2513 (for Gas Piping Systems) ASTM F1055 (Electrofusion Fittings)

Asmuss Group recommend that the installation of all PE pipe fittings, only be undertaken by suitably qualified and experienced operators.

PP-R / PP-RCT

Section 8

WEFATHERM is a complete system for domestic and commercial, hot and cold water reticulation. Having a comprehensive range and relevant industry approvals, it is a widely used and recognised system in New Zealand.

WEFAKLIM is a fibre pipe providing a plastic option for HVAC applications.

We have all the tooling necessary for installing this system and are able to provide you with training.

WEFATHERM PP-R Piping System

The Wefatherm PP-R System is ideally suited for use in a wide range of applications including hot and cold water systems, industrial heating and cooling, air-conditioning systems and compressed air networks. PP-R is the ideal replacement for traditional materials such as copper, steel and galvanised piping.

Benefits

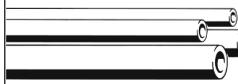

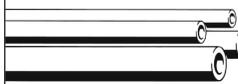

- Light weight, Non-toxic, Corrosion resistant
- Low pressure loss, Reduced noise
- Low thermal conductivity
- Fusion welded joints, Simple and economical installation

Range

- Complete product range, 20mm to 160mm
- PN10, PN16, PN20, fibre pipe and stabipipe
- Made in Germany to the highest international standards

Drainage

Section 7

PE Drainage is a low noise, fully fused system that is ideal in commercial buildings through to trade waste applications.

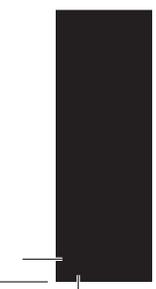

Vulcathene, a specifically designed chemical waste system, is the only real choice for laboratories in hospitals, schools and universities. This is a full system of pipe, fittings and traps.

A PE Syphonic design and quoting service is available on request.

PE Drainage

Vulcathene Chemical Waste System

PE DRAINAGE

■ GEBERIT HDPE Piping System

The Geberit Polyethylene (PE) drainage system is ideally suited for use in a wide range of applications including: above and below ground drainage, normal and industrial waste and stormwater, as well as rainwater discharge inside domestic and industrial buildings.

Standards and Quality Marks

Geberit PE Drainage is produced in conformity with the unified standard EN 1519 and has Watermark License W210 under MP52 Spec 005: - Sanitary plumbing pipes and pipe fittings.

Benefits

- Quick and simple to install, via either butt welding or electrofusion welding
- Safe, secure and flexible
- Fewer blockages as PE's non-wettable surface resists build up and aids faster flow to reduce the likelihood of blockages
- High impact resistance, even at low temperatures
- Low noise transmission
- Wide temperature range
- Excellent abrasion resistance
- Good chemical resistance, please contact Asmuss Group for suitability

Applications

A Geberit PE Drainage system is ideally suited to applications where high integrity is required:

- DWV services and ducts in and under buildings
- Industrial waste drainage
- Hot and cold waste lines
- Sewer or drain rehabilitation
- Where ground or structural movement could occur (e.g. earthquakes)
- Siphonic roof drainage systems
- "Greasy" tradewaste

For information relating to Siphonic drainage systems and Sovent ventilated stack systems please refer to Asmuss Group.

PE Drainage

■ GEBERIT HDPE Piping System

PE DRAINAGE FITTINGS CONT...

Due to its high capacity and excellent performance Geberit Sovent is an ideal drainage system for:

- High-rise office buildings
- Hotels
- Multi-storey residential buildings

Why is Geberit Sovent a better solution?

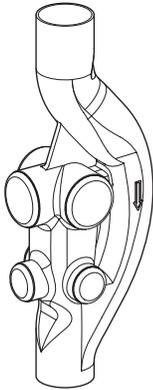

There is a simple answer to that:

- Better performance, less space, labour and material cost

Better performance.

In comparison with conventional systems, Geberit Sovent:

- Reduces the pneumatic and hydraulic pressure
- Offers versatile branch joining possibilities
- Reduces stack sizes with the same loading capacities as a secondary ventilated system
- Saves space

PE Drainage

■ GEBERIT HDPE Piping System

GEBERIT PLUVIA SIPHONIC ROOF DRAINAGE SYSTEM

**Double the amount of rainwater discharge.
Half the pipe diameter.**

Geberit Pluvia outlets have been specially constructed to ensure rapid removal of rainwater from the roof using siphonic principles with a vacuum effect.

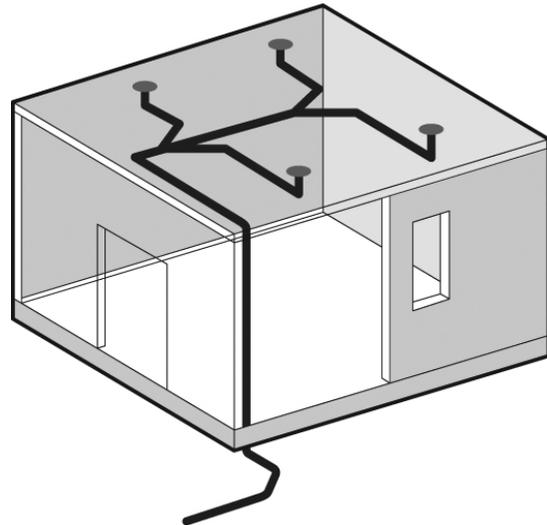

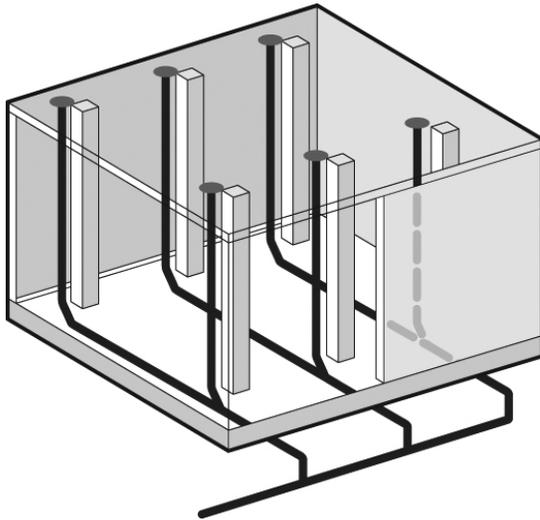

Greater installation flexibility.

The Pluvia system is simpler because no slopes are required for horizontal pipe runs, reducing ceiling space. Smaller pipe diameters can lead to lower material cost and greater installation flexibility.

Service and support.

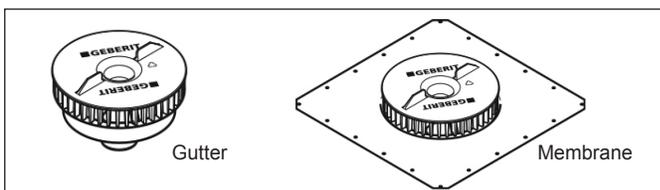

Geberit offers a comprehensive service package for customers from training to designing and onsite technical support. Fully accredited, our staff are able to assist consultants with the design of the Pluvia roof drainage system.

Advantages of Geberit Pluvia over conventional roof drainage systems

- Many roof outlets
- Pipe laying necessary on a slope
- Many stacks
- Complicated underground pipes
- Large pipe dimensions

- Fewer roof outlets due to the high drainage capacity per roof outlet
- Space savings
- Reduced construction effort
- Smaller pipe dimensions
- Self-cleaning of the pipes due to high flow speeds
- Architectural freedom

Roof outlets are a key component of a siphonic roof drainage system. Geberit roof outlets are available in gutter and membrane styles. Various sizes are available. Roof outlets are not sold individually as they are supplied as part of the total siphonic system. Each siphonic system is custom designed to suit individual buildings and roofs and the required ARI. Siphonic roof drainage systems are quoted as a lump sum, and must be ordered as a package.

	CODE:	SIZE (OD) mm	PRICE
Electrofusion Control Unit Welds 3 joints at one time (up to 110mm)	GEBERITESG3	40 - 315	1985.07

Pipework support: It is recommended that Geberit siphonic roof drainage systems are installed using a suspension rail system and appropriate pipe clamps. Anchor brackets (fixed points) must be provided when the pipeline changes orientation and also to control expansion and contraction. Please enquire about pipe clamps designed to be used with the EF (anchor) tape listed below.

Chemical Waste System Vulcathene Mechanical & Enfusion

Asmuss Group's Chemical Waste Systems continue to provide a comprehensive, corrosion resistant answer to severe industrial, trade and laboratory discharges.

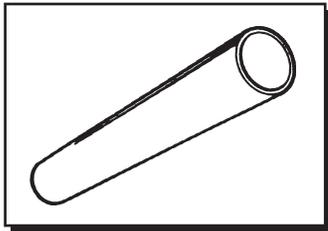

This is a complete range of pipes and fittings in nominal sizes 40mm to 150mm with specialist accessories such as drip cups, antisiphons, dilution traps, sinks, etc.

Produced under ISO 9002 and QAS/48/4836/22 quality standards, Vulcathene holds BBA certification No 9/2805 for all its mechanical system, together with US NSF approvals and complies with AS/NZS 3500.2.2 with many above and below ground installations completed over the years.

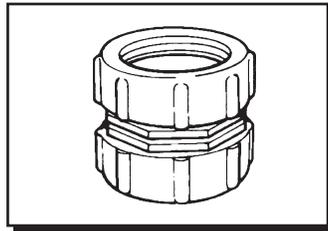

Today Asmuss Group offers 3 compatible and interchangeable parts to the system.
