

STEEL CONSTRUCTION

We are problem solvers - that's our core business.
We represent some of the best brands in the world
for steel and flow control products.

By combining our extensive product range with our
local knowledge, we offer our clients comprehensive
tailored solutions.

We service the following market segments:

Bridges
Retaining
Piling
Pre & Post Stressed Concrete
Structural Steel
Commercial Construction

OUR STORY.

We're a successful New Zealand owned business that's been trusted to deliver for our customers for 100 years.

Founded in 1920, the Asmuss Group has supplied many of the biggest industrial and construction projects in New Zealand and is one of the largest privately-owned companies in its field.

A focus on quality products, technical excellence and exceptional customer service has been the cornerstone of our philosophy.

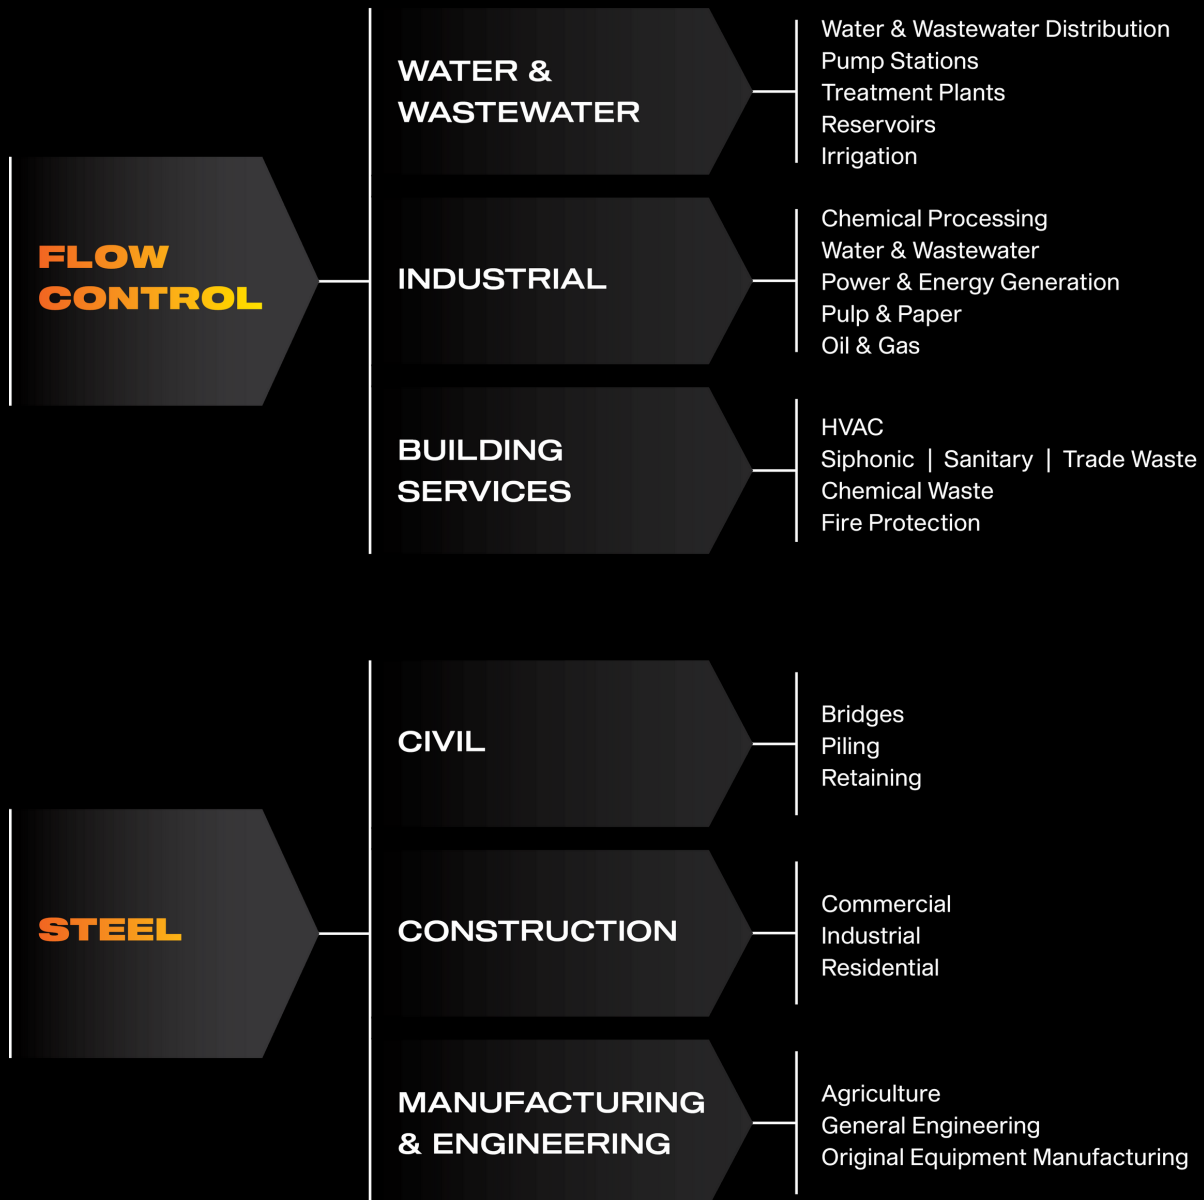

We believe longevity in business is about having a true partnership with our valued suppliers and customers, going through the ups and downs, and succeeding together.

OUR EXPERTISE.

- We understand your market and it's unique challenges
- Our specialist team sources the best brands around the globe
- We coordinate our resources across all sites to ensure you receive the optimal product combination tailored to meet your specific requirements
- We offer local technical sales support and installation training
- We have proven experience in supplying products to some of New Zealand's largest infrastructure projects

ONE COMPANY, MANY SOLUTIONS.

**WE'RE HERE
TO CREATE
A STRONGER
NEW ZEALAND
BY HELPING
OUR CUSTOMERS,
COMMUNITIES
AND PEOPLE
SUCCEED.**

OUR PRODUCTS

Our Steel division only procures from the most reputable mills around the world, to certify product quality and traceability.

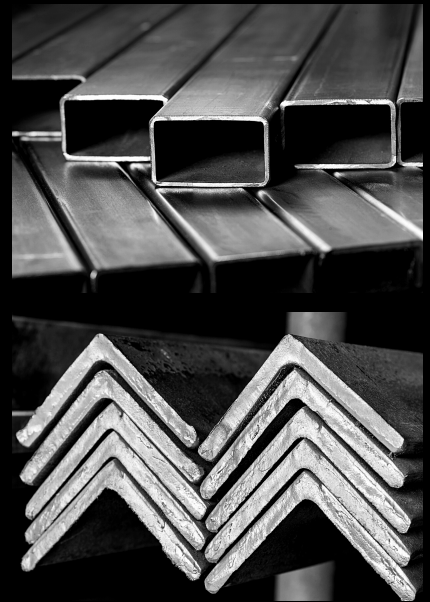

Additionally, we are able to source unique / non-standard product as well as meet large project requirements.

Having supplied materials to a large array of Civil, Industrial and Energy projects, we are proficient at meeting tight lead times, preserving material integrity and offering competitive pricing

We can supply a very extensive range of steel products, including:

- Universal bearing piles (UBP)
- H Piles
- Custom welded sections
- Spiral welded pipes (SSAW)
- Straight seemed pipes (LSAW)
- Spiral welded pipes
- Straight seamed pipes
- Universal columns
- Universal beams
- Plates
- Sheet piles
- Reinforcing
- PC strands
- Wide flanged beams
- Welded beams
- Welded columns

RECENT PROJECTS

1 AUCKLAND CITY COUNCIL CIVIC BUILDING

The Civic Quarter Mixed-use Precinct will result in the Civic Administration Building – a significant piece of Auckland's architectural history – and its surrounding area transformed into new housing and commercial spaces. This includes a hotel, residential accommodation and an exciting new Performing Arts Centre.

Asmuss supplied 400 tonnes of steel to this project.

2 APL INDUSTRIAL ESTATE

APL (Architectural Profiles Ltd) new 44,000 square metre plant is one of the country's largest industrial builds. The plan change changed 30 hectares of deferred industrial zone land and 26.7 hectares of rural zone land into industrial.

Asmuss was engaged to supply 1100 tonnes of steel beams and columns.

3 LYTTTELTON PORT REBUILD

Lyttelton Port was extensively damaged during Canterbury earthquakes, which led Earthquake Recovery Minister Gerry Brownlee to request a recovery plan. Work started in mid-2016 and is expected to be completed in 2024.

Asmuss supplied 8700 tonne casings as well as line pipe for this project.

4 COOLSTORE - WIRI

This was a project to build both a new cold store as well as a new office and administration building.

Asmuss was engaged to supply 600 tonnes of steel. The specification for this cool store required the steel to be Charpy tested to -30 °C, far exceeding parameters of traditional testing.

For this project, testing, quality and traceability were paramount.

5 ARMY BAY OUTFALL PIPE

This project was part of the \$31 million dollar upgrade at Watercare's Army Bay Wastewater Treatment Plant and consisted of a two-kilometre wastewater pipeline driven beneath a north Auckland regional park into the Hauraki Gulf. The achievement was a Kiwi first and also set a world record.

Asmuss was engaged to supply 980 tonne of 1219 mm SSAW linepipe.
