

+GF+ CLEAR PVC PIPE

FOR METRIC & IMPERIAL SYSTEMS

Clear PVC piping is a valuable addition to our PVC piping systems. We have both metric and imperial dimensions available to match either the +GF+ Metric PVC or the Schedule 80 PVC systems respectively.

We also have a range of clear fittings and valving available, as well as the clear cement and primer required for joining the piping systems.

Please contact our sales team for information on our other piping and valving systems.

IMPERIAL CLEAR PVC

	Code	Size (NB) mm	Wall Thickness mm
--	------	-----------------	----------------------

Ideal for site glasses within Schedule 40/80 Hi-Strength systems, or other imperial pipework.

Refer to Schedule 80 section for dimensionally compatible fittings.

Please contact us for chemical compatibility.

PVC-u Schedule 40	Code	Size (NB) mm	Wall Thickness mm
	PPVCC/015	15	2.9
	PPVCC/020	20	3.0
	PPVCC/025	25	3.6
	PPVCC/032	32	3.7
	PPVCC/040	40	3.9
	PPVCC/050	50	4.1
	PPVCC/080	80	5.8
	PPVCC/100	100	6.3
	PPVCC/200	200	8.6

+GF+ METRIC CLEAR PVC-U

	Code	Size (NB) mm	Wall Thickness mm
--	------	-----------------	----------------------

This European range can be used as a visual inspection point for our secondary containment system as well as for standard site glasses.

This pipework has a nominal pressure rating of PN16 to 63mm and PN10 for larger sizes.

Refer to PVC-u Industrial PROFIT section for dimensionally compatible fittings.

PVC-u PN16	Code	Size (NB) mm	Wall Thickness mm
	192017105	16	1.2
	192017106	20	1.5
	192017107	25	1.9
	192017108	32	2.4
	192017109	40	3.0
	192017110	50	3.7
	192017111	63	4.7
	192017088	90	4.3
